

2012 Undergraduate Student Member Scholarship awarded to

Wilson Chim
Simon Fraser University

“I am in the Bachelor of Science Chemistry Honours program at Simon Fraser University (SFU). During my third year, I started to volunteer for Dr. Paul C.H. Li - an Analytical Chemistry Professor at SFU - helping the analytical teaching laboratory to develop new experiments, and to implement cost-saving strategies. I published two research papers under Dr. Li, and continued to do research in Dr. Li’s Lab under an undergraduate NSERC award and a Honors Research course. I have presented my research at several Undergraduate Research competitions. My enjoyment of Science and Chemistry motivates me to take part in various Science related activities. I am on the executive of the SFU Chemistry Student Society and have been representing and speaking for Chemistry Students. I have also been volunteering as a team leader for the SFU Science Community Initiative (SFU SCI) to promote camaraderie within the student community in the Faculty of Science through academically-oriented social events. I have volunteered at SFU Open House events and am involved in the “Let’sTalk Science” program. In the future, I plan to continue my involvement with the Science and Chemistry communities and to pursue higher education.”
