

ASSOCIATION OF THE CHEMICAL
PROFESSION OF BRITISH COLUMBIA

2019 Undergraduate Student Member Scholarship awarded to

William Primrose

**Thompson Rivers
University**

This is my fourth year at Thompson Rivers University. Majoring in chemistry has been one of the best decisions I've made so far as it has opened my eyes to so many wonderful aspects of science and allowed me to meet many wonderful people. As Director of the EUREKA! Science Program at TRU, I have had countless opportunities to spread my love of chemistry to the youth of this community as a mentor and an administrator. I am beyond excited that I get to oversee the program once again this summer. Our chemistry workshops and activities are always very popular. Kids have a unique appreciation for science that reminds me every day why I have chosen to pursue this field. I have also been able to pursue the academic side of chemistry; I was fortunate enough to have been offered a UREAP scholarship that has let me pursue research for several months, which has been very rewarding. My plan for the fall is to apply to be a TRU lab instructor while I finish my studies and in September I will be applying for graduate studies in chemistry. My long-term goal is to teach chemistry at the university level and continue to encourage people from all walks of life to learn more about science.
